IBM MAS 8 Planning Workshop

- **Understand your migration path**
- **Learn your future infrastructure requirements**
- **Understand migration requirements**
- **Receive a tailored, high-level project plan and budget estimates**

AGENDA

Day 1 Sessions:

- Overview of the Maximo Application Suite's elements and value beyond Maximo 7.6.x.

- What's the big deal about OpenShift?

   A review of the technical benefits of OpenShift and how it differs from current hosting methods.

- The new AppPoints licensing model explained... and applied.

   Includes an analysis of your current licenses and how they translate to the new points model.

- Live demonstrations of the OpenShift (ex. tools, views, logs, data) environment and administration of MAS 8 (ex. app deployment, API keys, managing users).

- Open discussion: Near and long term goals for your Maximo environment.

Day 2 Sessions:

- Receive and review an upgrade / migration project plan (.mpp) template with scope, order and timeframe to consider.

- Calculate and review the results of your needed OpenShift environment size which is based upon expected Users and computing needs.

- Utilize TRM tools to calculate the hosting costs based upon environment/computing needs.

- Work through scenarios, using your approximate information, to tailor your high-level project plan and budget.
