GET STARTED WITH TRM

- **MAS 8 Planning Workshop**
  - a 2-3 day on-site workshop
  - Scope your upgrade project, size your future infrastructure, and transition licenses to MAS App Points.

- **MAS Hosted DEV Environment**
  - Wish to become familiar with MAS without a platform-level installation and configuration? Access a MAS Hosted Dev Environment.

- **MRO Master Data Services**
  - Don't suffer from poor quality maintenance data which can lead to poor reliability and high costs.
  - We provide plant walkdowns, clean up master data, correct Bills of Materials, and fix PMs

- **Upgrade from Maximo 7.6.1.2 to MAS 8.x**
  - Tap into our in-house Red Hat Openshift (R) and Docker Kubernetes expertise.
  - Surf our library of webinars, blog posts, and e-books at www.trmnet.com

---

Take action before failures occur while simultaneously preventing unnecessary maintenance by better allocating limited resources. IBM Maximo Application Suite (MAS) 8 comes with all required tools to efficiently implement CBM and PdM programs on the same platform as Maximo.

MAXIMO APPLICATION SUITE OFFERS

...access to a full suite of asset life-cycle applications, on your journey to predictive maintenance, with flexibility to start at any point in the asset life-cycle

Manage
Asset Management with TRM Maximo AAM
- Manage Maintenance by Optimizing performance
- Maintain high-value assets by using AI and analytics,
- Extend asset life cycles
- Reduce operational downtime and costs

Inspect
Visual Inspection and Anomaly Detection
- Make computer vision for inspection automation with deep learning more accessible to business users with an intuitive toolset that does not require coding knowledge

Monitor
Remote Monitoring Will Detect Anomalies
- AI-powered remote asset monitoring
- Empower leaders to act with confidence and drive digital reinvention.

Mobile
Inspect AI/Remote Assist
- Integrates the capabilities from all our asset and facility management solutions to deliver the right operational data and step-by-step guidance to technicians when and where they need it

Health
Health, Safety & Environment Manager
- Manage the health of your assets using IoT data from asset sensors, asset records and work history to increase asset availability and improve replacement planning

Predict
Improve Asset Reliability
- Condition-based predictive maintenance uses data to predict failures
