

FedRAMP SaaS

Secure Cloud Services for
Federal Agencies and Contractors

Maximo and TRIRIGA Secure Cloud Service Offering, for U.S. Federal and non-Federal (e.g., Utilities) Workloads, which removes the barriers to cloud adoption.

Ensure that your cloud services protect your vital information with our IBM Maximo and TRIRIGA FedRAMP agency authorized SaaS offering, currently at the Moderate security level (325 NIST SP 800-53 security controls).

In support of the Office of Management and Budget's (OMB) Cloud First policy, FedRAMP (Federal Risk and Authorization Management Program) enables federal agencies to rapidly transition from old, legacy IT to secure and cost effective, cloud-based IT.

IT INCREASES:

- Consistency and confidence in the security of cloud solutions using NIST and FISMA defined standards
- Transparency between US government and cloud providers
- Automation and near real time continuous monitoring
- Central sharing and access to security packages for expedient authorizations
- Security authorization validation to ensure there is uniformity among security packages

99.8% Availability SLA

24 x 7 x 365 Support

Offsite Backups

Automatic Software Updates

TRM has worked in partnership with IBM to plan, design and build the infrastructure needed to develop this offering from the ground up. This comprehensive certification and accreditation effort involved the development and execution of a comprehensive System Security Plan (SSP) that clearly articulated policy, process, procedures, resources, infrastructure, tooling, etc. to ensure we met the 325 controls, validated by a 3rd Party Assessment Organization (3PAO).

This solution differentiates from other FedRAMP infrastructure-as-a-Service (IaaS) offerings in that it also includes Software-as-a-Service (SaaS) which makes this Maximo and TRIRIGA cloud service offering the only end-to-end solution in the marketplace

FedRAMP Agency Authorized SaaS			
IBM Maximo and TRIRIGA on Cloud for U.S. Federal
